

# COMPRESSED NATURAL GAS VEHICLES AND ENGINES

**Express/Savana Cargo Van**

**Express/Savana Cutaway  
Specialty Vehicle**

**Isuzu NPR HD/ GM W4500**

**C4500/5500 Bus**

Baytech offers Compressed Natural Gas fueled GM, Isuzu, and Workhorse Custom Chassis vehicles and engines. Baytech's CNG fuel injection systems are EPA and CARB certified and are available in dedicated CNG and bi-fuel configurations.

## **Baytech Sequential MPFI technology**

The CNG fueling system incorporates Baytech's Sequential Multi-Point Fuel Injection system technology for gaseous fuels. Engine calibration software is implemented in the OEM Engine Control Module (ECM) computer, providing optimum fuel control and diagnostics compatibility without the use of any add-on computers.

Closed-loop fuel control, spark advance and other engine parameters are optimized and controlled by the ECM. Engine diagnostics are accessed through the vehicle's diagnostic port using the same scanner tools used for OEM gasoline diagnostics.
